

Round Robin Bet Worksheet

SportsBrackets.net

Turn a handful of picks into a spread of smaller parlays.

Slate / date: _____

Your selections

Pick 1:	_____	Odds:	_____
Pick 2:	_____	Odds:	_____
Pick 3:	_____	Odds:	_____
Pick 4:	_____	Odds:	_____
Pick 5:	_____	Odds:	_____
Pick 6:	_____	Odds:	_____

The round robin

Number of selections N	_____
Combine by k (2-team, 3-team, ...)	_____
Number of parlays = N choose k	_____
Stake per parlay (\$)	\$ _____
Total stake = parlays x stake	\$ _____
Payout if all N legs win	\$ _____

How to use this sheet

1. A round robin breaks your picks into every smaller parlay of a chosen size.
2. With N picks combined by k, the number of parlays is N choose k.
3. Four picks by 2s = 6 parlays; five picks by 2s = 10; five picks by 3s = 10.
4. Total stake is the number of parlays times your stake on each one.
5. Unlike one big parlay, a round robin can still cash even if a pick or two loses.
